RE: Silkflo and Panalane H300E Composition

Dear Vantage Group Personnel,

Silkflo 364 Polydecene (INCI: hydrogenated polydecene) composition is 100% decene-1 homopolymer, hydrogenated, and is identified by CAS number 68037-01-4. There are no additives present in the product.

Silkflo 366 Polydecene (INCI: hydrogenated polydecene) composition is 100% decene-1 homopolymer, hydrogenated, and is identified by CAS number 68037-01-4. There are no additives present in the product.

Panalane H300E (INCI: hydrogenated polyisobutene) composition is 100% butene homopolymer, hydrogenated, and is identified by CAS number 68937-10-0. There are no additives present in the product.

Should you need any additional information please free to contact me or your INEOS Oligomers commercial representative.

Regards,

Gary Gudac
Technology Senior Staff Scientist
